Size	Ø5.5 x 9cm
Pack Size	9 x 12 x 8.5cm
Weight	0.250kg
Current	12V DC
Effect	20W
Part No.	HCSP00565

TOOLS FOR INSTALLATION

INSTALLATION GUIDE

1. Empty the tank if there is water in it. Unscrew the cap. Take out the water level sensor and carefully place it aside.

2. Loosen the hose clamp and unmount the hose from the pump with a SL5.5 screwdriver.

3. Unplug the 2 connectors. Cut the wires with a side cutter as close to the connector as possible. Loosen the PG joint and discard the connectors.

4. Drag the wire into the tank and remove the pump from the tank. Please discard the pump.

- 5.** Insert the new pump into water tank.
Pull the wire up through the PG joint.

- 6.** Strip off the 2 wires coming from the water tap about 6mm.

- 7.** Insert wires into the wire connector.
+ to + and - to -

- 8.** Mount the hose to the pump and tighten the hose clamp with a SL5.5 screwdriver. Ensure the to tighten the PG joint where the wire is reinforced.

9. Reinsert the water level sensor and tighten the cap.

NOTE: If the water pump does not work, please check step 7 and ensure you have connected the wires correctly

RECYCLING

Your product is designed and manufactured with high quality materials and components which can be recycled and reused. This symbol means that electrical and electronic equipment, at their end-of-life, should be disposed of separately from your household waste. Please dispose of this equipment at your local community waste collection / recycling center. In the European Union there are separate collection systems for used electrical and electronic products.

Please help us conserve the environment we live in!
